

SHIPPING & RECEIVING SOP

Consolidated from MRP, Customs, CUSMA, OpenBorder, and HubSpot PDFs

Source rule

This version uses only the five PDF documents provided by the user.

Related PDF page images are placed under the procedure section they support.

Document Control

Document title	Shipping & Receiving SOP
Department	Shipping / Receiving
Source documents	Canadian Customs Form Creation; CUSMA Form Creation; HubSpot Shipping Procedures; MRP Procedures; OpenBorder Procedure
Revision	1.0 - Consolidated from source PDFs
Purpose	Standardize outbound shipments, customer returns/RMAs, swap/module/part shipments, shipping-cost POs, customs documentation, and customer shipment notifications

1. Quick Reference

Border-clearing rule

On the CUSMA form, the HS Code name beside the description must match the HS Code in the next column.

1.1 HS Code Reference

HS Code	Name / Use	When to Use
8473.30.9100	Swap Module/Parts for Optical Scanner	Small parts shipments, new scanners, chassis/conveyor shipments, and outbound swap/module or parts orders
8471.60.80.00	Optical Scanner & Recognition Device	New, rental, refresh, and full machine swap shipments
9813.00.00	Canadian Goods Return	Full machine and module returns / return items

1.2 Folder and Record Rules

- Invoices are saved in the customer folder and are needed for OpenBorder booking.
- OpenBorder Shipment Summary must be downloaded from the Production Email SHIPPING DOCS folder and saved to the customer folder.
- CUSMA, Canadian Customs, and Commercial Invoice documents must be stored with the shipment or return record.
- QuoteID and shipping cost must be recorded in Commissioning Management.
- Shipping cost must be entered in MRPeasy with vendor V00061 OpenBorder and item A00464 Shipping Cost.

2. End-to-End Workflows

2.1 Outbound Machine / Scanner / Module / Parts Shipment

1. Create customer order in MRP / MRPeasy.
2. Book stock and choose serialized lots when required.
3. Create invoice and select the correct HS Code.
4. Save invoice to the customer folder and print required copies.
5. Create CUSMA when required.
6. Book outbound shipment in OpenBorder.
7. Upload Commercial Invoice and CUSMA as required.
8. Record QuoteID, carrier details, tracking, and cost in Commissioning Management.
9. Create shipping-cost PO in MRPeasy.
10. Send HubSpot shipment notice or parts-shipped email.

2.2 Customer Return / RMA Shipment

1. Create the return/RMA record in MRP / MRPeasy.
2. Enter returned item, quantity, and RMA type.
3. Create invoice using HS Code 9813.00.00 and note Canadian Goods Return.
4. Complete Canadian Customs and CUSMA documents when required.
5. Book return in OpenBorder using customer address as pickup and TCG as delivery.
6. Upload Commercial Invoice, CUSMA, Canadian Customs Form, and Proof of Delivery.

7. Record QuoteID, carrier details, tracking, and cost in Commissioning Management.
8. Create shipping-cost PO in MRPeasy.
9. Send HubSpot return shipment notice and attach required files.

2.3 Swap Module / Parts Shipment

1. Create outbound item using the return-item style process in MRP / MRPeasy.
2. Create invoice using HS Code 8473.30.9100.
3. Set note to SWAP Module/Parts for Optical Scanner.
4. Save invoice to customer folder and print two copies: one for crate and one for driver.
5. Book shipment in OpenBorder and send HubSpot parts-shipped email.

3. Procedure - MRP / MRPeasy Orders, Invoices, Returns, and Shipments

3.1 Create Customer Order

1. In Customer Orders, click Create.
2. Input customer company name.
3. Set Status to Confirmed.
4. Enter Account Number as the customer AN#.
5. Enter Serial Number as the TCGM#. This is usually the same as AN#, but not always; verify in the customer folder.
6. Under Product Type, enter the part number(s) of each item being sent to the customer.
7. Input Quantity.
8. Input Price per UoM. Use the Stock icon to find the cost under Cost.
9. Click Save.
10. Click Check stock and book items. Book all items; for items without stock, use Book Manually or create a Manufacturing Order. For serialized items, book manually and select the correct lot.

3.2 Create Invoice

1. After items are booked, click the + under Invoices/Quotations.
2. Change Status to Unpaid.
3. Input Account Number and Serial Number.
4. Input the correct HS Code: 9813.00.00, 8471.60.80.00, or 8473.30.9100.
5. Under Free Text, include Country of Origin: Canada.
6. Click Save.
7. Click PDF at the top of the page to open the invoice.
8. Save the invoice into the customer folder for OpenBorder booking.
9. Print the required invoice copy/copies.
10. Use the I00 invoice number as the OpenBorder PO.

3.3 Create Shipment Record

1. Create a new shipment.
2. Enter delivery date from OpenBorder.
3. Enter tracking number.
4. Save.
5. Click Pick all items > Yes. If serialized, select the proper serial numbers being sent, then save.

3.4 Customer Returns / RMAs

1. Under CRM, create the return record for PhysBatch-9000, module returns, refreshes, or swaps.
2. Input customer company name, return type, account number, serial number, and reason for return.
3. Input returned item: MA09 for PhysBatch, MA01 for Scanner, KIT006 or KIT007 for Chassis/Conveyor swaps.
4. Enter part description in Free Text and input Quantity.
5. Add RMA Type as Receipt and Credit.
6. Create invoice, set Status to Unpaid, enter account and serial numbers, input HS Code 9813.00.00, and note Canadian Goods Return.
7. Save invoice in the customer return folder and continue to the HubSpot procedure.

3.5 Outbound Swap Items

1. Input the outbound item using the same approach as Return Items.
2. Click Save.
3. Create Invoice and set Status to Unpaid.
4. Input Account Number and Serial Number.
5. Input HS Code 8473.30.9100.
6. Set note to SWAP Module/Parts for Optical Scanner.
7. Confirm product, quantity, and price are filled out.
8. Save, download invoice to customer folder for the outbound swap, and print two copies: one for crate and one for driver.

CREATING ORDER AND INVOICE IN MRP

1. CRM

- In **Customer** orders click "Create"
- Input Customers **Company name**
- **Status** – Confirmed
- **Account Number** – Customers **AN#**
- **Serial Number** – **TCGM#** (Usually the same as the AN# but not always the case. Find what TCGM# in the Customers folder.
- Under **Product type** in part #s of each part you are sending to Customer.
- Input the **Quantity**
- Input the **Price per UoM** (This can be found by clicking on the "Stock" Icon at the top of the page
 - Once In the Stock page, you can find the cost under **"Cost"**
- Click Save
- Click **Check stock and book items**
 - Book All Items. For Items that don't have stock you can **"Book Manually"** or create a **new Manufacturing Order** for the part. For Serialized items make sure you book Manually and pick from the correct Lot

2. INVOICE

- Once Booked create an Invoice by clicking on the "+" Under "Invoices/Quotations"
- Change Status to **"Unpaid"**
- Input the Account Number, and Serial Number (Same as the last page)
- Input **H.S Code**
 - **9813.00.00** - Canadian Goods Return (Return Items)

Related images: MRP Procedures - source PDF page 2

- **8471.60.80.00** - Optical Scanner & Recognition Device (Machine Shipments)
- **8473.30.9100** - SWAP Module/Parts for Optical Scanner (Small Parts Orders)
- Under Free text make sure to Include **"Country of Origin: Canada"**
- Click Save
- At the top of the page Hit the **"PDF"** Button, this will open the New Invoice you have created
- Save the Invoice into the Customers folder, you will need this to book your shipment on **Open Border**
- Print a copy of the Invoice.
 - 1 Copy is needed for small shipments under \$500, if it is \$500 or over print 1 for the Driver
- The **"100****"** is the Invoice number you will need to input into Open Border "PO"

3. **SHIPMENT**
- Create a new shipment
 - Delivery Date – Input delivery date you picked on Open Border
 - Enter Tracking #
 - Save
 - Click Pick all items > Yes > (If Serialized pick the proper Serial #s you are sending > Save

CUSTOMER RETURNS (RMAS)

- 1.
- Under CRM, this tab is used to Return Physbatch-9000 or Modules, Send out Refreshes, or Swaps
 - Click Create
 - Input Customer Company Name
 - Type, choose the type of return
 - Account Number – Input customer AN# for Machine or part that is returning. You can find this in the "Returning" Tab in the Commissioning Sheet and searching the customer

Related images: MRP Procedures - source PDF page 3

- Serial Number – Same as Account Number, you can find this information in the “Returning” Tab
- Choose the reason for Return

2. **RETURN ITEMS**

- Input Item that is being returned. MA09 for Physbatch, MA01 for Scanner, KIT006 or KIT007 for Chassis/Conveyor Swaps
- Input Part Description in the Free text
- Input Quantity
- Add RMA Type as **“Receipt and Credit”**
 - Create Invoice
 - Status Unpaid
 - Input Account Number
 - Input Serial Number
 - Input HS Code “9813.00.00”
 - Note should be “Canadian Goods Return”
 - Make sure Product, Quantity, and Price is filled out
 - Click Save
 - Save Invoice in Customers Return Folder
 - Flip to Hubspot Document

3. **OUTBOUND ITEMS**

- Input Item if you are sending out an item. This step will be the same as the “Return Items” Above.
- Once Complete click Save
- Create Invoice
 - Status Unpaid

Related images: MRP Procedures - source PDF page 4

- Input Account Number
- Input Serial Number
- Input HS Code "8473.30.9100"
- Note should be "SWAP Module/Parts for Optical Scanner"
- Make sure Product, Quantity, and Price is filled out
- Click Save
 - Download Invoice and put it into Customers Folder for the outbound Swap.
 - Print Invoice (2 Copies. 1 Copy for the Crate and 1 for the Driver)

4. Procedure - Creating a CUSMA Form

1. Open CUSMA form in browser.
2. Enter part numbers in F. PART NUMBER / SKU. Each item is a new line.
3. Enter the description used in the Commercial Invoice under F. DESCRIPTION OF GOODS. Place HS Code names beside the description.
4. Enter G. HS TARIFF CLASSIFICATION using the HS Code matching the HS Code name in the description column.
5. Use 8473.30.9100 for Swap Module/Parts for Optical Scanner.
6. Use 8471.60.80.00 for Optical Scanner & Recognition Device.
7. Use 9813.00.00 for Canadian Goods Return.
8. Set H. ORIGIN CRITERION to B.
9. Set I. COUNTRY OF ORIGIN to CA.
10. Export and download the document, then move it to the shipment folder.
11. Print required copies: one copy for shipments under \$500 CAD, or two copies for machine shipments - one for the shipping sleeve and one for the driver.

Related image: CUSMA Form Creation

Related image: CUSMA Form Creation - source PDF page 1

CREATING CUSMA

1. Open **CUSMA** form in browser
 - Enter part #'s in first column "**F. PART NUMBER / SKU**" each item is a new line
 - Enter Description you used in the Commercial Invoice under the 2nd column "**F. DESCRIPTION OF GOODS**". HS Code names beside the Description. HS Code name must match the HS Code in the next column or it will have issues clearing the Canadian/US Border
 - **G. HS TARIFF CLASSIFICATION** is the HS Code matching the HS Code name in the DESCRIPTION OF GOODS column. There is only 3 HS Codes we use, they are:
 - **8473.30.9100 - Swap Module/Parts for Optical Scanner** – used for small parts shipments, or shipping out new Scanners or Chassis/Conveyor
 - **8471.60.80.00 - Optical Scanner & Recognition Device** – used for New, Rental, Refresh, Full Machine swaps
 - **9813.00.00 - Canadian Goods Return** – used for Full Machine and Module Returns
 - **H. ORIGIN CRITERION** - "B"
 - **I. COUNTRY OF ORIGIN** - "CA:"
2. Export the document and download it, then move the file into the folder made for the shipment. We need to have a copy for each shipment so we can refer to it in the future.
3. Print document depending on the shipment. For shipments under \$500 CAD you can print 1 and attach it to your small shipment in the medium shipping sleeve. For Machine shipments you need to print 2 copies. 1 copy for the shipping sleeve and 1 copy for the Driver.

5. Procedure - Creating a Canadian Customs Form

1. Open Canadian Customs Form in browser.
2. Change Vendor to company name and address.
3. Fill out TAX ID from the customer information form in the customer folder.
4. Change the date of shipment.
5. Change other references to the correct Commercial Invoice number.
6. Line 11: Number of Packages - amount of packages being sent.
7. Line 12: Specification of commodities - description of items being returned.
8. Line 12 Quantity - repeat line 11.
9. Line 14: Unit price - price of items being sent, tax not included.
10. Line 15: Total - total price of all items being sent.
11. Line 16: Net / Gross - net weight and gross weight of items; gross will be the same as net.
12. Line 17: Invoice Total - carry down total from line 15.
13. Line 19: Exporter name and address - copy vendor information above except TAX ID.
14. Save the form, rename it with the company name at the end, and put it into the correct customer folder.

Related image: Canadian Customs Form Creation

Related image: Canadian Customs Form Creation - source PDF page 1

CREATING CANADIAN CUSTOMS FORM

1. Open **Canadian Customs Form** in browser
2. Change **Vendor** to Company Name and Address
3. **TAX ID must be filled out. You can find TAX ID in the customers info form in their folder**
4. Change the **date of Shipment**
5. Change **other references** to correct Commercial Invoice #

ON THE FORM

11. **Number of Packages** – This is the amount of packages being sent
 12. **Specification of commodities** – This is the Description of the items being returned
 12. **Quantity** – Repeat of line 11, this is the amount of packages being sent
 14. **Unit price** – Price of Items being sent. Tax not included
 15. **Total** – Total price of all Items being sent
 16. **Net** – Net Weight of Items / Gross – **Gross** Weight of Items. Will be the same as Net
 17. **Invoice Total** – Carry down total from line 15 to here
 19. **Exporter's name and address** – Copy Vendor information above except for TAX ID
- When Complete save Form and Rename it with Company name at the end. Then put it into Customer folder it belongs in

6. Procedure - OpenBorder Outbound Shipment Booking

6.1 Request Quote

1. Pick the date you are shipping the package or crate. FedEx will always do next-day pickup.
2. Set Pickup to our address.
3. Set Delivery to the customer address.
4. Set PO to the Commercial Invoice number.
5. Set Invoice Currency: small packages in CAD, crate shipments in USD.
6. Set Shipment Type: machine shipments are LTL; box shipments are Parcel.
7. Toggle Show Estimated Freight Class above Add Handling Unit.
8. Enter package information. Description is the parts being shipped or Card Sorting Machine / Scan Blaster Module.
9. Set Packing Type to Box, Crate, or Bag / Envelopes.
10. Enter Length, Width, and Height from the box/crate dimensions reference.
11. Weigh the package on the scale under the packing desk; packages under 1 lb default to 1 lb.
12. Leave Freight Class, NMFC Code, and Sub Code as defaults.
13. Add emergency contact as your name and use the work phone number +1 825 779 2636.
14. Set Value of Carriage to the cost of the package going out.
15. Set Currency to the Commercial Invoice currency (CAD or USD).
16. Do not insure crates when AirTags are added to each shipment.
17. Click Continue.

6.2 Carrier, Timing, Uploads, and Summary

1. For small packages, choose FedEx and no other carriers. Pick the cheapest option.
2. For crate shipments, pick the cheapest option if the shipment is not urgent.
3. Click Continue.
4. Check all customer information. Double-check address changes and confirm delivery start/end time.
5. Upload Commercial Invoice and CUSMA form from the customer folder.
6. Click Continue.
7. Copy QuoteID OB***** to Commissioning Management under Open Border Tracking and Courier Tracking. Add carrier details.
8. Add total shipment price to OB Quote USD or OB Quote CAD depending on currency.
9. Click Finish Booking.
10. Check Production Email for SHIPPING DOCS, download Shipment Summary, and save it to the customer folder.

STEP BY STEP GUIDE FOR SHIPPING ON **OPENBORDER**

1. **REQUEST QUOTE**

- **Pick date** as date you are shipping out the Package or Crate (FedEx will always do next day pick up)
- **Pickup** is the Location your package is shipping out from (Our Address)
- **Delivery** is where your package is going to (Customer Address)
- **PO** is the Commercial Invoice #
- **Invoice Currency** (Small Packages in CAD, Crate Shipments in USD)
- **Shipment Type** can vary but Machine shipments will always be **"LTL"**. Box shipments will be under **"Parcel"**
- Toggle **"Show Estimated Freight Class"** on the right side of the page above "Add Handling Unit"
- Fill out the information of your package
 - **Description** is what parts you're shipping out or one of the following
 - Card Sorting Machine
 - Scan Blaster Module
- **Packing type** will be the packaging material (Box, Crate or Bag {Envelopes})
- **Length, Width, Height** is all located on the bottom of the Box. Crate dimensions and Scanner box dimensions are on the monitor labeled
- **Weigh** your package on the scale under the packing desk. Packages under 1lbs will default to 1lbs
- **Freight Class, NMFC Code, Sub Code** will always default
- Add your **emergency contact** as your name
- **Phone** will be the work Phone Number on the back of the iPhone +1 825 779 2636
- **Value of Carriage** is cost of the package going out.
- **Currency** will be Commercial Invoices Currency (CAD or USD)
- No need to Insure crates as we add Airtags to each shipment
- Click Continue

Related images: OpenBorder Outbound Shipment Booking - source PDF page 2

2. **CARRIER DETAILS**

- **FedEx** for small packages (do not pick any other carriers) Pick cheapest option
- For crate shipments pick the cheapest option if shipment is not in a rush
- Click Continue

3. **TIME & LOCATION**

- Make sure all information is correct for customer. **Double check address** as there can sometimes be address changes. Delivery time and end time should be filled out.
- Click Continue

4. **DOCUMENT UPLOAD**

- On the drop down menu, upload your **Commercial Invoice and CUSMA form**. Both will be needed to clear borders to go to the USA/Mexico. Commercial invoices are found in our OneDrive folder.

TCG Machines – Documents > 03_CRM and Support > 01_Customers > Customer Files > Find Customer folder > Pick Invoice and CUSMA

- Click Continue

5. **SUMMARY**

- Copy "QuotelD" **OB******* and add it into the Shipping Tab in Commissioning Management under the Column "Open Border Tracking and Courier Tracking. Fill out Carrier details there as well.
- Take the Total Price of shipment and add it into Shipping Tab in Commissioning Management under the Column "OB Quote USD, OB Quote CAD" dependent on if you used USD or CAD
- Click Finish Booking
- Check Production Email the Inbox should have a Folder under named "SHIPPING DOCS" download the Shipment Summary and add it to the customers folder

7. Procedure - OpenBorder Return Shipment Booking

1. Pick the date you are shipping the package or crate. FedEx will always do next-day pickup.
2. Set Pickup to the customer address.
3. Set Delivery to our address.
4. Set PO to the Commercial Invoice number.
5. Use CAD for small packages and USD for crate shipments.
6. Machine shipments are LTL; box shipments are Parcel.
7. Confirm whether the return is a box or crate with Customer Service. Incorrect packaging type can cause overweight fees.
8. Enter package information, dimensions, weight, contact, phone, value of carriage, and currency.
9. Choose FedEx for small packages and pick the cheapest option. For crates, pick cheapest unless urgent.
10. Double-check customer information, addresses, delivery time, and end time.
11. Upload Commercial Invoice, CUSMA form, Canadian Customs Form, and Proof of Delivery. Upload the Commercial Invoice again for Proof of Delivery.
12. Copy QuoteID and carrier details into Commissioning Management.
13. Add total price to OB Quote USD or OB Quote CAD.
14. Click Finish Booking and save Shipment Summary from SHIPPING DOCS to the customer folder.

 - **Expected Date** – Approximate date to be delivered. You can find this information on the Open Border Booking Summary Form from Email Inbox
 - **Order ID** – Tracking #
 - **Shipped on** – Date it will be shipped out

- **Item** – A00464 Shipping Cost
- **Quantity** - “1”
- Input Shipping cost under “**Price**” Make sure the currency is the same as on the Commissioning Management form
- Save

9. Procedure - HubSpot Shipping Communication

1. Open HubSpot in browser.
2. Find the CRM icon on the left side of the page.
3. Click Companies.
4. Search for the customer and click their name.
5. Create a new email.
6. Choose the main contact for the company. If unknown, find the main contact on page 2 of the customer information form or under shipping contact.
7. Click Templates.
8. For full machine shipments, select 5 - SHIPMENT Notice. Paste the tracking URL from the Shipping tab in Commissioning Management beside Tracking Number.
9. For returns, select SHIPPING - Return Shipment Notice. Fill in customer name, pickup via, day, month, date, and pickup times. Upload return files using the paper clip icon.
10. Find packing lists at TCG Machines Documents > CRM and Support > Shipping > Packing Lists > choose correct one for return.
11. For swap modules or part shipments, use the parts-shipped email template.
12. When all information is complete, send the email.

Parts / swap email wording

Hello _____,

Your Parts have been Shipped!

You can confirm this shipping information through the tracking number below.

Tracking Number: _____

If you have any difficulties or questions, please reach out and I will assist you.

Best regards,
